DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 55-78 & 80-83, drawn to a color matching and gamut comparing system for multiple printers, classified in class 358, subclass 2.1.

II. Claim 79, drawn to an image histogram color analysis system, classified in class 358, subclass 522.

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as gamut matching and comparison without the histogram analysis recited in invention II. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be

examined even though the requirement be traversed (37 CFR 1.143).
